## 2023 Plastic Container Recycling Process via East Jordan Plastics

1. Remove debris from pots (don't need to rinse with water).
2. Each individual pallet or bale of plastic pots to be recycled, must be comprised and sorted by the same material type:
  - HDPE #2
  - Polystyrene #6
  - Polypropylene #5

Tags & Bench cards labeled : PS#6, PP#5, HDPE #2

3. Stack/palletize & wrap.
4. Label with company name, you may receive a refund for recycled items. Payment is dependent upon material type, quality of sorting, quantity of material, location, and current resin markets. For pricing in your area, call: 269-637-3700.
5. East Jordan will pick up wrapped, sorted pallets, but must fill at least half a semi-truck (or "12 of 28 footprints"). They can schedule pick ups for multiple locations. A full truckload of material is 26 skids stacked to 90"-100" in height. Schedule pick up at least 2 weeks in advance or along with delivery from EJP.

For more specifics on East Jordan plastic recycling go to:
